

Draycot Joining Instructions

Location

1. Leave M4 at **junction 15** and head **South on A346**.
2. **Turn right** (after the petrol station, before the farm shop) on to The Ridgeway.
3. **Follow this road** around to the left, as it becomes Draycot Close.
4. Take the **next right** and follow this road to an electric gate in a farm complex.
5. Please **contact us** here so we can open the gate and escort you on the airfield.
6. The insert show you the route to where we operate at Draycot.
7. Please **keep an eye on the sky** – we may be operating already.

Facilities

- There are **limited facilities provided** – a small indoor space and a portalo. We operate from our Mobile Control, Control and Communication Vehicle.
- A mobile hot food van normally comes around lunchtime.
- We advise you to **bring your own food and drink** for the day.

Clothing

Please dress according to the weather. The testing takes place on an **open airfield** where there is little shelter from all the elements: sun, rain and wind. **Wind chill** is a serious threat in colder months and **sunburn/sunstroke** is equally serious in warmer months. With this in mind, please bring:

Colder months

- warm layers
- windproof layers
- warm hats
- warm gloves

Warmer months

- sun cream
- sunhat
- clothes to protect/cover your skin from the sun
- Plenty of water

If you are unsure, pack for both – it is better to have too many options than not enough.

We also wear high visibility clothing on the airfield for safety. If you have your own **Hi-Vis clothing** please bring it. If not, we do have a few spares.

Other

Some other points to note:

- Please **follow our instructions** throughout the day. These will be either for your safety or for your convenience.
- If you are not sure, **please ask us**.
- Please **drive slowly** (less than 10 mph) on site and **keep an eye on the sky** around our operating area.
